To Whom it may concern:

Here is a letter of my experience in the wood industry. You will see that my background is widely diversified in the re-manufacturing operations.

My fees are \$600.00 per day plus all expenses. For air travel, I will be paid one days rate depending on distance. When using my vehicle for travel, the rate is 37 cents per mile. Any commissions of finders fees on equipment that I design or have built or purchase for your operation will be above and in addition to my normal rate.

There may be additional flat fees for machinery redesign or modifications that will be determined as they arise.

I also have seminars available for finger joint operations. The presentation is designed for operators, maintenance personnel and foremen, from upper management to the people that are running the jointer. The seminar is a practical hands on approach with over 30 computerized drawings of set up procedures, from setting the joint to grinding the heads. I charge \$600.00 for the seminar and \$50.00 for each person that attends. The company will receive one manual to keep.

Thank you for the opportunity to help.

Chris Huggins, President & Owner
